Produced in Italy

BPA-free

**Did you know that this is not just any other can of tomatoes?** La BIO IDEA organic open field tomatoes are grown and produced in the south of Italy by dedicated organic farmers close to the sea. They are ripened in open fields by the generous Italian sun and light salty winds coming in from the sea. This gives them an excellent, full flavour. After they have been picked at their optimum ripeness, they are processed within 24 hours in a 100% organic tomato factory in the region not far from the fields. Keeping them delicious and full of taste and vitamins!

One of our organic tomato farms employs people with mental and physical disabilities. They are an essential part of the production process and with their work they earn independency and respect.
